VINYL PRODUCTS

Pouring the Foundation. Great finish systems are built on superior quality sealers. Our products are formulated to provide the optimum base for high quality Post-Catalyzed topcoats. Chemcraft gives you the foundation for success with quality you can build on.

■ CHEMVINYL Pre-Catalyzed Sealer

This Pre-Catalyzed vinyl sealer has superior moisture resistance, high solids and excellent durability. Its water white formulation makes it the best choice for multi-step color systems.

■ CHEMVINYL Clear Sealer**

The universal choice. Compatible with all our high quality topcoats, it's easily the most versatile sealer in our portfolio. CHEMVINYL Sealer's water white formulation makes it an excellent choice for multi-step color systems, and it can be used under various types of topcoats.

■ CHEMVINYL HS (high solid) Sealer

This state-of-the-art catalyzed vinyl sealer delivers superior adhesion over a wide variety of stains and substrates. This, along with its extreme moisture resistance, makes it an excellent choice for kitchen cabinets. It also provides exceptional build due to its high solid design.

■ VERSAPRIME™ Pigmented Primer**

Outstanding performance and versatility. VERSAPRIME is compatible with all Chemcraft Pre-Catalyzed and Post-Catalyzed products when catalyzed. This white formulated vinyl basecoat is fast dry with excellent sandability and, with its very clean and bright white color, provides superior hiding. VERSAPRIME makes an excellent choice for a tinted primer system.

For additional information refer to the individual product sheets.
